SOCKET TYPES

PRODUCT FEATURES

- glare suppressed product
- Working time
- cut-out size in mm
- type of chip
- built in LED light source
- number of connectors
- from the viewpoint of logistics, the product is of XL size
- product equipped with motion sensor
- RGB
- RGB+white
- remote controllable
- adjustable colour temperature
- GU10 socket
- E27 socket
- modes of lighting
- end of life: the product is available in a limited quantity only and there will be a replacement product
- instant full brightness
- IP protection degree of product
- dimmable
- non-dimmable
- temperature-display
- alarm function
- calendar function
- colour of product
- operates with a LED fluorescent lamp
- operates with a light source with screw fitting
- operates with a GU10 light source
- light direction
- Smart device controllable
- product equipped with an IP68 quick connector
- touch-controlled RGB ambient light

FILAMENT BULBS

As compared with LED technology, in case of filament products, chips are placed on separate, transparent columns and are coated with phosphor. These are professionally designed light sources, they are efficient and can create a unique and special atmosphere in your home.

JUMBO/SOFT FILAMENTS

The jumbo filament series give out a soft light that is pleasing for the eyes to look at while being strong enough to brighten up the space. They can also be dimmed to create the desired intensity level. They are the ideal light bulbs, appropriate in cosy environments such as the living room, bedroom or the dining area. Furthermore they are also quite popular in restaurants, clubs, bars, cafés and hotels. Available in extra warm color temperature (2400K).

HALOGEN BULBS

Halogen bulbs are available in a wide range for any socket type a household may require. They are similar in size and brightness to conventional light bulbs and provide the same brightness with 30% less energy consumption. When turned on, they emit full brightness immediately.

FLOOR LAMPS

An important criteria of a floor lamp is to fade into the style of the room and its furnishing. But that is not all. When installed in the right place, it also shapes our home with its elegance, and convenient functions. The floor lamps available in our assortment are characterised by a modern, simple and yet elegant design. Our products equipped with integrated LED have long lifespans. They are available in warm white and in CCT design, that is their colour temperature can be adjusted using a remote controller.

WATER-RESISTANT CEILING LIGHTS

The ceiling lights equipped with splash-proof IP protection are exquisitely suitable both for indoor and outdoor use. They are an ideal choice for the illumination of bathrooms, garages, cellars and gardens. Thanks to their high IP protection degree they can be widely applied, almost anywhere.

DESIGN OYSTERS

With our Design Oyster ceiling lights you can bring a unique, yet sophisticated style to your home. Three lighting modes are available for each type. The first and second modes use a combination of warm white and cold white LEDs to achieve different lighting effects, while the third mode uses warm white and cold white LEDs simultaneously to create a natural white color temperature, doubling both power and brightness.

PENDANT LIGHTS

LED-STRIPS

LED strips have a wide application range, besides indoor decoration lighting, accent lighting, hidden ambient lighting, outdoor decor lighting, they are suitable for festive decoration lighting of shops, restaurants, places of entertainment. Stripes of various power levels, length and colour temperature are available.

LED-STRIPS

LED STRIP 220V

The 220V single-color LED strips are available in 50-meter rolls and can be operated from network. Due to its IP67 protection and silicone coating, it can also be used outdoors and is easy to clean. Recommended for decorative lighting, Christmas lighting, or even billboard decoration.

The product can be cut per meter. To avoid electric shock after cutting, and to keep the tape waterproof, it is mandatory to use an end cap, which is recommended to be attached to the silicone LED tape with a waterproof (transparent) adhesive.

Controller is not needed if you want to use the LED strip in fixed brightness mode. In this case, it is sufficient to use the power supply that is included in the packaging. In order to be able to control the brightness and the lighting mode it is necessary to use a controller.

Available models:

With natural white color temperature, SMD3528 chip, 4.8W / meter

With natural white color temperature, SMD5050 chip, 14.4W / meter

Besides this, RGB color variations and 50m packaging.

POWER SUPPLIES

A power supply is essential to operate the LED strips. Power supplies are available in a wide range of designs and performance, in stabilized 12V and 24V DC operation, from 24W up to 400W.

ALU PROFILES

Aluminium profiles can be used in many areas of lighting, making it easy to install, route or hide LED strips. In addition to the wall-mounted version, we also offer corner profiles, recessed wall and floor profiles, bendable and waterproof profiles.

FLOOD LIGHTS

Reflectors are a popular light source for both industrial and domestic applications due to their wide range of usages. From powerful floor-mounted work lights to those with surface-mounted motion sensors, they all offer efficient operation and long-lasting durability.

SPOTS

Spot lamps can be recessed into suspended ceilings and can be fixed easily. The internal part of the frame can be tilted, thus the light of the installed lamp can be directed in the preferred angle for maximum light utilization. Its light is directed, it is emitting light at an angle of 38° in a focused way. It is also ideal for lighting up narrower spaces, including kitchen counters and cabinets with a mirror. Spots are available in both round and square shapes.

LED PANELS

Recessed and surface mounted designs are equipped with integrated SMD chips, therefore their use combines low energy consumption with high light utilisation. Besides household application, they can be used in many areas. Thanks to their outstanding efficiency and power, LED panels are extremely popular in office spaces, retail units, schools or hospitals. They are available in various sizes and power levels in built-in and wall-mounted designs.

LED PANELS

Recessed and surface mounted designs are equipped with integrated SMD chips, therefore their use combines low energy consumption with high light utilisation. Besides household application, they can be used in many areas. Thanks to their outstanding efficiency and power, LED panels are extremely popular in office spaces, retail units, schools or hospitals. They are available in various sizes and power levels in built-in and wall-mounted designs.

LED TUBES

LED fluorescent tubes offer solution to replace conventional fluorescent tubes. Their brightness surpasses even of the neon tubes, their consumption is measurably lower. Integrated LED fluorescent tubes are flicker-free and they illuminate at their full brightness once switched on.

TRI-PROOF FIXTURES

Due to their IP65 protection, these luminaires are fully protected from dust and vapour, thus, they have a high level of protection against entry of vapour, dust and other solids. They are recommended for the illumination of industrial halls, storage rooms, corridors, workshop rooms or cellars.
