Symbols explanation

							
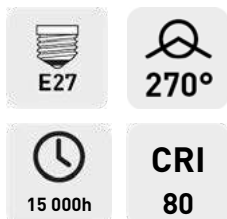

Watt	Lumen	Number of LEDs	Lighting angle	Luminous range	Built-in battery	Battery type	Rechargeable with solar battery
							
Item not included	Socket type	Warm white colour temperature	Natural white colour temperature	Cold white colour temperature	RGB variable colour	Motion detector	IP protection
							
Product with USB connector	Number of Euro sockets	Number of Schuko sockets	Flush-mounted switch	Surface mount switch	Cable length	Cable type	Product with switch
							
Storage capacity	Number of ranges	Number of heating elements	Oscillation	Fan mode	Fan grid diameter	Equipped with a timer	Breaking force
							
Product length	Product width	Product thickness	Cutting size	Weekly setting	Daily setting	Analog	Digital

LED Bulbs

LED light sources are high-efficiency LEDs that replace conventional light bulbs. They are perfect for replacing household lighting solutions in a variety of decorative forms. They are available in three different colour temperatures, 3000K, 4000K and 6400K, in wattages from 4W to 18W. Their low power consumption and long lifetime result in significant savings. They are non-flickering and easy on the eyes. Switching on and off has no life-shortening effect.

Extension cords

Entac power strips and extension cords are indispensable tools for workplaces and households. They help you to power all your electronic devices, even if the power source is located in a remote corner of the room.

Night Lights

Children's rooms and dark corridors can be perfectly illuminated with our night lights, which can be plugged directly into the power source, making it easy to find your way around. You can choose from our 0.5 W, 25 lumen nightlights in warm (WW), natural (NW) and cold white (CW) colour temperatures. These night lights are available in orange, white and blue colours, round or square shapes. Thanks to its clever „Dusk to Dawn” function, it does not require switching on and off, it turns itself on at sunset and turns itself off at sunrise.

Humidifiers

The ideal humidity for room air is between 40-60%. Humidity levels lower than this result in dry air and can irritate the respiratory tract: coughing, dry nose and dry mucous membranes are less resistant to pathogens. Entac humidifiers can even be used with essential oils to help create a relaxing atmosphere in the room and improve well-being.

Switches and sockets

The range of wall switches, sockets and connectors offers an excellent solution for both indoor and outdoor use. The Arnold category of indoor flush-mounted wall switches and connectors provides stylish solutions in white and silver. Stephan switches and sockets are IP54 rated, so they are resistant to both dust and splashing water.
