## SPOTS

Spot lamps can be recessed into suspended ceilings and can be fixed easily. The internal part of the frame can be tilted, thus the light of the installed lamp can be directed in the preferred angle for maximum light utilization. Its light is directed, it is emitting light at an angle of  $38^\circ$  in a focused way. It is also ideal for lighting up narrower spaces, including kitchen counters and cabinets with a mirror. Spots are available in both round and square shapes.
